

## CONDOR GREEN ATTITUDE

---

# Think Green for a better future!

## Some small suggestions to help you disposing our packaging in the best way.

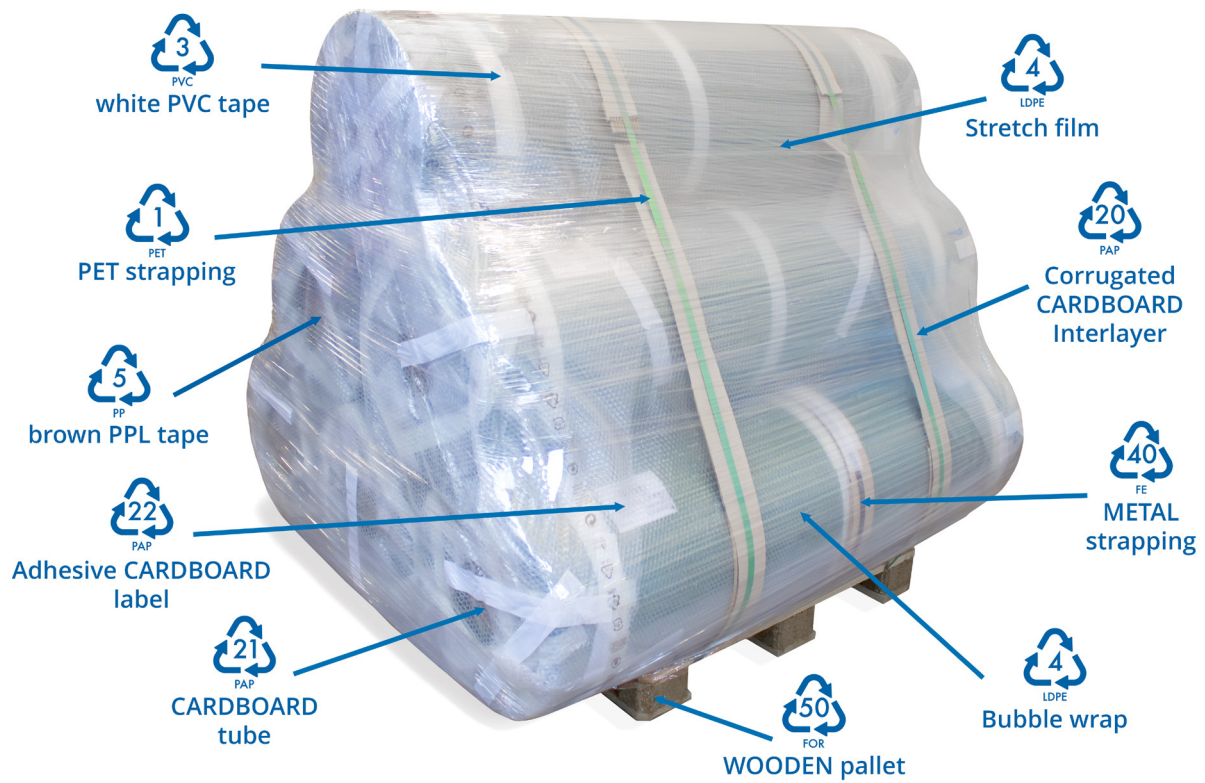

Legislative Decree no. 116 of 3 September 2020 represents an important step forward in waste management in Italy, implementing European directives 2018/851 and 2018/852. Directive 2018/851 focuses on waste reduction and promotes a circular economy, encouraging the reuse and recycling of materials. On other hand, Directive 2018/852 specifically deals with packaging and packaging waste, setting ambitious targets for recycling and the reduction of unnecessary packaging.

The decree introduces measures to improve waste management, promoting sustainable practices and making producers responsible for packaging management. Furthermore, emphasis is placed on the importance of raising awareness among citizens regarding separate waste collection and waste reduction. In this way, Italy aligns itself with European standards, contributing to a cleaner and more sustainable environment for future generations.

**Condordieletric** is committed to promoting this practice by applying a personalized label that defines the disposal criteria for each of its packaging components and invites the end user to share new ideas on recycling these materials with the **Condor' staff**.

In the following pages we have drawn up a general overall list from which the Condor' staff will evaluate whether to use all the materials indicated or only those necessary to complete the packaging.
